CLEVELAND BLACK OXIDE

CLEVELAND BLACK OXIDE SPECIALIZES IN BLACKENING ARCHITECTURAL PANELS, FIXTURES & ACCESSORIES.

- Commercial & residential applications
- Interior & exterior applications
- Variety of surface finishes and textures (Shiny, matte & "distressed finish")
- Beautiful, durable and corrosion resistant finishes

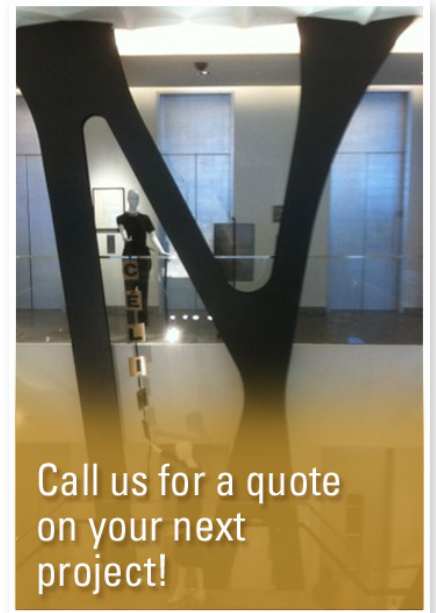

Customers come to Cleveland Black Oxide from all over the country because of our experience with large architectural panels and other products. We work with architects, builders and contractors and offer our expertise in helping your job go smoothly. Ask about our "ON SITE" black oxide service!

We have over 50-years of black oxide experience and process over 8-million pounds of carbon, alloy and stainless steels, brass, bronze, copper cast zinc and cast iron each year.

Panels, of course, require large black oxide tanks ... and we have the largest

black oxide tanks in the business at 17-ft in length. We've designed special handling equipment and custom fixtures specifically for panels -- eliminating damage to delicate surfaces.

Utilizing our proprietary hot black oxide chemistry and post-process finishes, we can give your panels the look and feel you're seeking for a specific job. Our processes are tightly controlled and recorded as part of your permanent job record. This means your panels will be consistent from lot-to-lot and job-to-job

Call us for a quote on your next project!
